WELCOME TO

Orlando Steel Enterprises, Inc. (OSE) is a distribution company that has been serving Florida for 30 years. In 1996, we expanded the company to include pre-engineered steel building structures. Our structures are built to meet or exceed most engineering requirements and have a wide range of styles to choose from.

OSE offers pre-engineered carports, garages and buildings in every size, style and color. Our structures can range from 10 feet to 40 feet wide and eave heights up to 16 foot. With additions, we can expand the structure to 150 feet in length, all under one roof.

We offer several standard sizes as well as any custom design you may need. Our knowledgeable staff will work with you to design the perfect structure to meet your specifications on our State of the Art Auto Cad Software.

Our selection of durable steel structures are an economical and convenient solution for homes and businesses. They will also provide protection for your vehicle, boat and farm equipment from the harsh Florida environment. Our products are locally Made in Florida and are built to last and we guarantee it.

FEATURES & BENEFITS

OUR STEEL

All of our buildings are made with cold-formed steel which provides superior yield and tensile strength

- 50,000 PSI Yield
- 55,000 PSI Tensile

These features will set our buildings apart from the rest:

360 DEGREE WELDING

CLOSURE STRIPS IN CORNERS

CORNER BRACES

TEK SCREWS ON 3 SIDES

ROOF LINES:

We have two basic roof designs, standard and conventional roof lines:

STANDARD:

The standard roof line consists of a radius bent corner with horizontal roof panels on the roof and sides. This product comes with a 1 year components warranty.

CONVENTIONAL:

The conventional roof line includes a purling roof system which allows the roofing to run vertically. This allows better water drainage off the roof. It also includes a ridge cap system and true boxed eave. This product comes with a 1 year components warranty and a limited paint warranty from the roofing manufacturer of up to 30 years.

True Truss Design

Vertical Roofing Purlins

All of these features give you a product that will ultimately stand the test of time and save you money in costly repairs.

EVERYTHING IS LOCALLY MADE & MANUFACTURED

STANDARD HORIZONTAL ROOF & ECONOMY MODEL

The standard horizontal style roof design makes it both sturdy and cost effective

FEATURES:

- Pre-Engineered to ensure structural performance
- Radius bent corners for additional strength
